PROFESSIONAL SUMMARY

Final-year Information Systems Engineering student with hands-on experience in full-stack development, DevOps, and cybersecurity. Fast learner with a strong ability to quickly adopt new technologies and apply them to real-world problems. Collaborative team player, applying GitFlow workflows, peer code reviews, and agile practices.

EDUCATION

Universidad Tecnológica Nacional — Facultad Regional La Plata 03/2022 – Present
Bachelor's Degree in Information Systems Engineering (final year)

- GPA: 8.32 / 10 — no failed courses
- Relevant coursework: Data Networks, Operating Systems, Databases, Systems Design, Information Systems Administration, Software Engineering & Quality, Software Development

Universidad Tecnológica Nacional — Facultad Regional La Plata 08/2025 – 01/2026
Diploma in Applied Cybersecurity (completed)

Egg Education 11/2021 – 07/2022
Full Stack Web Development · 500+ instructional hours

- Databases, backend, frontend, software architectures, GitHub

SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML, CSS, Bash/Shell

Frameworks: React, Django

DevOps & Cloud: Docker, GitHub Actions (CI/CD), Microsoft Azure, Railway

Security & Networking: Wireshark, VMware/VirtualBox, Linux, Nmap

Other Tools: Git/GitHub, Enterprise Architect

Languages: Spanish (native), English (B2)

PROJECTS & TECHNICAL EXPERIENCE

Kip — Markdown Note Manager (SPA) 2025
Individual Project · React · Django · Docker · Azure · github.com/ManuelRebol/Kip

- Developed a full-stack SPA with real-time Markdown rendering, replacing manual deployment with a 2-service Dockerized architecture on Azure.
- Engineered one-command environment setup, eliminating manual configuration steps and environment drift across dev and production.

EventHub — Event Management Platform 2024
Team Project · GitHub Actions CI/CD · Docker · Railway · github.com/SerraFacundo/eventhub

- Designed a GitHub Actions CI/CD pipeline across a 5-engineer team, automating 60+ tests per PR and continuous deployment to Railway.
- Enforced GitFlow and mandatory peer code reviews, delivering full test coverage with pipeline feedback under 6 minutes per PR.

RESEARCH

Ransomware as a Service (RaaS) — Technical Research Paper 2026
Diploma in Applied Cybersecurity, UTN FRLP

- In-depth analysis of multi-extortion models, internal architecture of RaaS platforms, exploited vulnerabilities, legal frameworks, and high-impact case studies.
